WATERPROOF/NOISE CANCELLING MICROPHONE

COILED TUBE/EARMOLD

TACTICAL/D PTT SWITCH

SPECIAL AIR SERVICE (SAS) HEADSET SYSTEM -MEETS MIL-SPEC. STANDARD 810C

The Special Air Service (SAS) Headset System is one of the best tactical headsets available in the world and is the choice of some of the most progressive operators around the globe because of its superior audio clarity, durability and functionality . The SAS can also be concealed under clothing and double as a covert communication system without adaptation. The unit features the TC-Tactical/D Push-To-Talk button, Pro-Series Coiled Audio Tube, the super-comfortable/multi-sized TACT-LITE earmold, and a Waterproof/Noise-Canceling Microphone that ensures excellent transmit audio. Radio Connection for specified radio is also included.

Optional Sniper Push-To-Talk Switches are also available (P/N TC-V1-10513)

SNIPER PTT

T.A.C.K-(OPTION 1) TACTICAL HEADSET SYSTEM -A Headset design of the future that meets MIL-STD 810C Standards Today.

The T.A.C.K.- (Option 1) Headset is a progressive, head-worn communication headset for various applications. Its design allows it to be worn in conjunction with any tactical helmet, bicycle helmet, hat, hood or gas mask for long periods-with comfort. The low-profile/waterproof boom microphone provides exceptional transmit audio (with or without a gas mask) and is extremely rugged. The T.A.C.K.-Option 1 version (shown here) utilizes a low-profile pivoting speaker to deliver sound transmission to your left ear. The headset frame is made from high-quality coated steel and has been formulated to facilitate shaping for a custom fit. The frame remains stationary during vigorous activity. A Tactical/D PTT and radio connection is included.

An optional Sniper Push-To-Talk (P/N: TC-V1-10513) is also available.

Ordering is easy. Please provide your radio make and model. Radio connections designed to fit most popular makes and models of radios.

communications

T.A.C.K-(OPTION 2) TACTICAL HEADSET SYSTEM -Meets MIL-STD 810C Standards.

The T.A.C.K.- (Option 2) Headset is a progressive, head-worn communication headset for various applications. The T.A.C.K- (Option 2) Tactical Assault Communication Headset combines a proven headset design with the benefits of multi-fit earmold. Its design allows it to be worn in conjunction with any tactical helmet, bicycle helmet, hat, hood or gas mask for long periods-with comfort.

The T.A.C.K.-Option 2 version is shown here, and includes TACT-LITE™ Earmold and Coiled Audio Tube to deliver sound transmission to your left ear allowing for excellent peripheral hearing. The low-profile/waterproof boom microphone provides exceptional transmit audio (with or without a gas mask) and is extremely rugged. The headset frame is made from high-quality coated steel and has been formulated to facilitate shaping for a custom fit. The frame remains stationary during vigorous activity. A Tactical/D PTT and radio connection are included.

An optional Sniper Push-To-Talk (P/N: TC-V1-10513) is also available.

T.T.M.K.-TACTICAL THROAT MICROPHONE HEADSET

Touted as one of *the best* throat microphones in the world... The Tactical Throat Microphone Headset is an impressive, Mil-Spec, throat microphone system that is used world-wide by tactical teams, military units, firefighters, E.O.D. teams, hazardous materials teams and special forces groups. The **T.T.M.K** is the choice for teams deploying gas masks or SCBAs. Works excellent in a high-noise environment as well. The **T.T.M.K.** includes a dedicated radio connection for your radio, a Tactical/D Push-t-talk switch, a comfortable throat microphone collar, heat and chemical resistant Pro-Series coiled acoustical tube and a non-occluding **TAC-LITE** earmold. An optional Sniper Push-To-Talk (P/N: TC-V1-10513) is also available.
